

# VERSATILE CONVERTING MACHINE VCM 300

Left and below is an illustration of a typical multi drive, inline 2 colour converting machine.

## VCM Specification

300 mm (11.8 in) web width  
Single station machine fitted with:  
Cantilevered Unwind.  
Corona treater.  
'S'wrap speed control rollers  
Flexo printing head.  
UV Curing System.  
Two Hot Air Clam Shell Drying Ovens.  
Water cooled chill rollers.  
Cantilevered Rewind.

For many years RK have been designing and building **Versatile Converting Machines (VCM)** for R & D, Pilot and Production applications used across many different types of industries. Unlike our Rotary Koater where the process must be carried out within standard design constraints the **VCM** is optimized to the specific requirements of each process and can utilise higher specification drives, tension and web control equipment.

The **VCM** is built using the same concepts as our Rotary Koater, an open framework, on which various standard assemblies can be fitted. This ideology enables either simple single process or more complex multiple process configurations to be readily attained. The heavier framework also enables wider and heavier substrates to be processed while still allowing considerable flexibility to expand or modify the machine as developments or applications change.

**For more information about the Versatile Converting Machines (VCM), please contact Testing Machine Inc. at 631-439-5400**

### Main Headquarters

**Testing Machines Inc.**  
2 Fleetwood Court  
Ronkonkoma, NY 11779  
Tel: (631) 439-5400  
Fax: (631) 439-5420
