New 17-36 Short Span Compression Tester for the Paper industry

Messmer Büchel located in the Netherlands will release the brand new 17-36 Short Span Compression Tester at the Interpack Show in Düsseldorf, Hall 12 booth C04-5. The 17-36 SCT is the successor of the previous 17-34 model. The Short Span Compression Tester measures the strength of liner and fluting medium at a distance of 0.7mm. With this information it is possible to predict the compression strength of a container. For the producer, this means optimization of the end product at an early stage of production saving time and money.

André Jansen, Managing Director of Messmer Büchel, says: “With this new Short Span Compression we have developed a complete package. The user interface has been improved making navigation quick and intuitive. Also our unique clamping system has been further improved by using low friction gliders resulting in cleaner data. Besides the instrument we also developed a new PC communication software, GraphMasterPro. The software is made for data storage and analysis. It can also be used to operate the instrument. Mr. Jansen continues, what I personally like most of the instrument is the modern and compact design. With this instrument Messmer Büchel takes another step toward the future”.

To see the instrument visit the Interpack Show Booth at Hall 12 / C04-5. or contact us: www.testingmachines.com or email: buchel@buchelby.com

Messmer Büchel
Messmer Büchel located in the Netherlands has an excellent reputation as a specialist manufacturer and supplier of Quality Control Equipment specifically designed to meet the needs of the pulp, paper and corrugated industries. Messmer Büchel is part of a larger company with multiple specialized companies in rigid plastic, foils, air leakage and air permeability.

Notes, not for release

This press release can be used free or changed if wanted. If you are interested in the high resolution pictures simply send an email to eoosterveld@buchelby.com. Do you want to see the instrument live and talk to us at the Interpack show in Düsseldorf? If you do not have the time to visit us there, give me a call or an email.
